

- Integrated speed up valve with cylinder for maximum efficiency and performance
- Trunnion-supported cylinder gives high breaking forces throughout the entire working cycle as well as stable movement
- The replaceable tooth system, which is fast and effortless, allows high productivity
- With its wider jaw, exceptional closing force and short cycle times, ProDem pulverizers provide excellent productivity in concrete reduction and reinforced steel separation
- Increased durability has been achieved with the use of abrasive-resistant materials. Advanced design and construction produces a powerful and durable attachment to handle the toughest jobs
